Sigen Power Sensor Comm Kit Installation Instruction

Publisher: Sigenenergy Technology Co., Ltd.

Revision History: Version 1.0, Aug. 2025

Background

Sigen Power Sensor Comm Kit (PSC) is a device used for improving the compatibility between Generation Signaling Devices (GSD) and Sigen Energy Storage System for installation in Queensland.

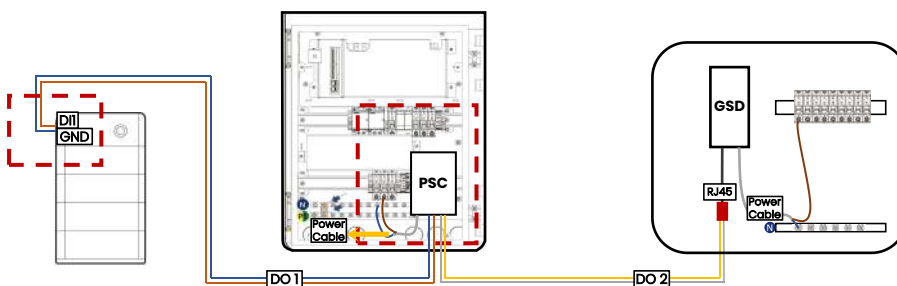

Communication Diagram

The following Diagram shows how to connect the PSC device in Sigen Energy Storage System.

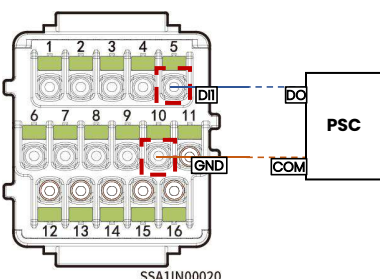

Scenario 1: PSC installed in home Switch Box

Scenario 2: PSC installed in Sigen Energy Gateway

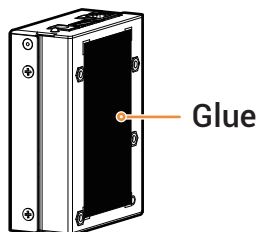

Wiring for Sigen Energy Controller Communication Interface

Description	Interface definition	COM terminal of the inverter	Requirement
DRM 0	DI1, digital input 1	5	<ul style="list-style-type: none"> When switches S0 and S9 are switched on, the solar inverter should be turned off. When switch S0 is switched off, and switch S9 is switched on, the solar inverter should be grid-tied.
	Signal GND	10	

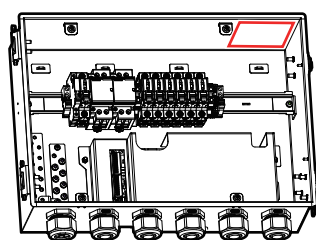

Sigen Power Sensor Comm Kit Installation Guide

You can peel off the Glue Cover and stick Power Sensor Comm kit (PSC) device to any suitable location.

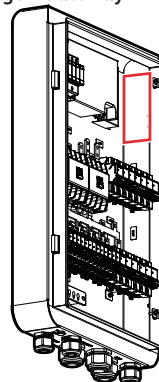

Recommend Stick Position (as Red Mark) inside Gateway

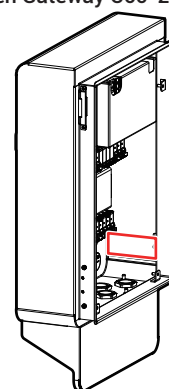

Sigen Gateway SP AU

Sigen Gateway TP AU

Sigen Gateway Home SP/TP AU
Sigen Gateway C60-2 AU

S (Cu): 0.5–1.5 mm²

OUTPUT S: 0.2–1.5 mm²

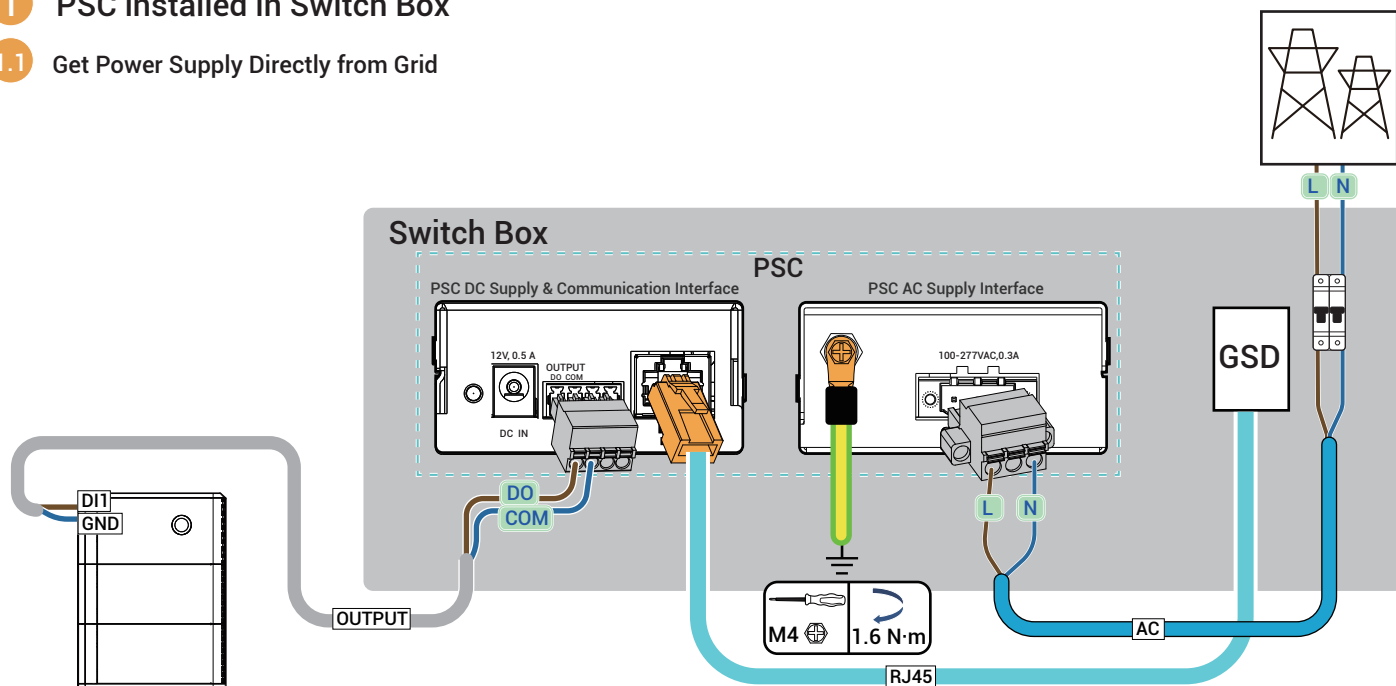

RJ45 CAT 5e

AC S: 0.5–1.5 mm²

AC-DC Adapter
Output Voltage: 10.8–13.2 V
Output Current: 0.5 A
Adapter Plug: DC 5.5×2.1

1 PSC installed in Switch Box

1.1 Get Power Supply Directly from Grid

1.2 Get Power Supply from household power outlet
