

SolarEdge 3-Phase Home Hub Storage Solution

Smarter Solar for Every Three-Phase Home

Home Hub Universal 3-Phase Hybrid Inverter

- 10kW backup-capable inverter
- Connect up to 24.25kWh of storage per inverter
- 200% PV oversizing for faster battery charging

3-Phase Home Battery

- Modular & stackable up to 24.25kWh
- Long-lasting LFP cell technology
- Backed by a 10-year warranty

Backup Power You Can Count On

Supports partial or whole-home backup

Dark start capability for grid-down recovery

Connect up to 3 inverters for 30kW of backup power

SolarEdge 3-Phase Home Hub Storage Solution

Homeowner Benefits at a Glance

More Energy

Harvest 15%* more energy per panel compared to conventional string systems with SolarEdge Power Optimisers

Simple Control

Customise your system to the way that suits your lifestyle with the mySolarEdge app

Built-In Safety

Arc fault protection, SafeDC™, and temperature sensors come as standard

Peace of Mind

Backed by a trusted brand and comprehensive warranty

15%*

MORE ENERGY

**Based on research conducted by the UNSW SPREE using real-world data. The results define how much DC energy can be harvested at a module level (1:1) compared to a typical string system (with a single string), not taking into account system efficiency differences.

Actual results may vary depending on system design, installation, and environmental conditions. SolarEdge does not guarantee specific energy gains. Full academic publication pending.
