

iStore Univers EMS monitoring portal provides real-time monitoring, anywhere and anytime!

Australian owned

with local warranty & tech support

Flexible design

4 x MPPTs allowing 8 string panel layout

Active Safety

AI powered arc detection & prevention (AFCI)

Smart PID Recovery

Minimises performance degradation of solar panels

Unlock the full potential of your commercial solar projects with the iStore 29.9kW and 40kW commercial inverters.

When it comes to commercial solar solutions, iStore inverters are the go-to choice for innovation, safety, and lasting performance.

EXTENDED WARRANTY

✓ **10 year warranty**
(parts & labour)

✓ **FREE 2 year warranty extension**
(parts only)

Perfect for medium to large commercial installations, the iStore commercial string inverter is a particularly powerful, intelligent and efficient 8-string inverter; one of the best on the market today.

To protect & maximize your return on investment, these inverters go the extra mile with PID recovery technology, minimising performance degradation in your solar panels over time.
