

# Polyphase Backup Board

**SKU: [ACB-PB]**

**Item No: 5976**

- Designed for use with SolarEdge single phase inverters and batteries
- Facilitates whole-site backup functionality in the event of a grid outage
  - In the event of an outage, the 3 single phases outputs become one
- Implements mechanical interlock to avoid line-to-line faults commonly found elsewhere
- Adjustable time delays in backup transition & changeover sequence
- High quality Hager switchgear
- Board rated for 63A per phase (inverters rated to 50A)
- Assembled in-house and compliant to relevant Australian standards
