

CORRUGATED EMU PROLINE

- + Direct to corrugated roof sheet fastening system
- + Landscape and Portrait installation

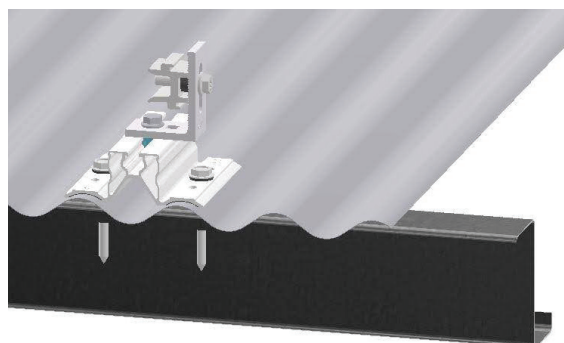

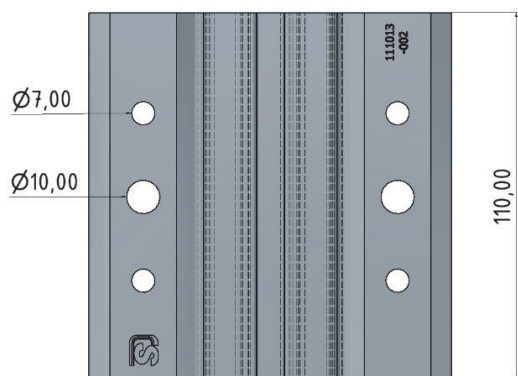

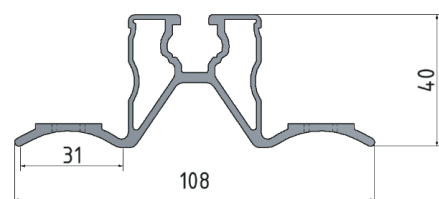

FAST & VERSATILE MOUNTING FOR CORRUGATED SHEET ROOFS

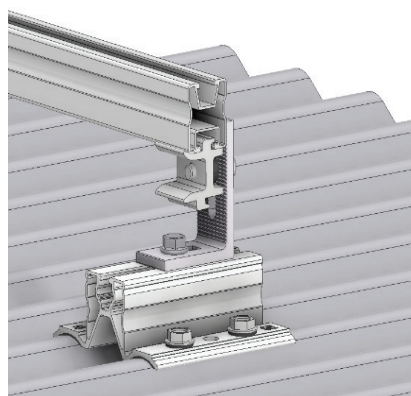

The Corrugated Emu is a reliable mounting solution designed for photovoltaic installations on corrugated sheet roofs. Engineered for fast and efficient installation, the system minimises the need for complex roof preparation while delivering a secure and durable connection. Suitable for both portrait and landscape module orientations, it offers flexible installation options with compatibility for both on-purlin and off-purlin mounting applications.

Its optimised design helps reduce material stress and installation time, making it an ideal solution for projects requiring a simple, robust, and time-efficient mounting system.

DIMENSIONS

Corrugated Emu installed on-purlin

Landscape & portrait orientation with Corrugated Emu installed off-purlin

TECHNICAL DETAILS

Scope of application	Compatible with Lysaght custom-orb roof sheet
Material	Systems components: + Corrugated Emu: Aluminium + Stainless steel screws + Sealing Rubber: EPDM
Structural analysis	Structural analysis according to the current specific national s (Australia AS/NZS 1170.2-2021). It also complies with DIN EN 1991-1 based on Eurocodes and general construction approvals. Roofing and building certificates are not included. Any instructions on required certification and approval must be observed.
Required tools	TORX40, 13mm socket
Warranty	25 Years according to our warranty terms.

ARTICLE OVERVIEW

111013-204	Corrugated Emu ProLine
900000-360	Direct to Sheet Screw - 4 per Corrugated Emu (off-purlin)
900000-070	Universal Screw 70mm - 2 per Corrugated Emu (on-purlin)
Accessories (pre-assembled)	
- BOLT M8X20, FL LS DIN EN1665, A2-70 - RapidPro L - NUT SQ M8, WS13 DIN 557, A4-70 - KlickIn click component for Nut M8, PA 6 E - Direct to sheet screw 5.5 x 25 - FixW Clamp KK Base - Corrugated EMU EPDM rubber self-adhesive
