

KINGFIX/TRIMFIX EMU

- + Cost-optimised direct fastening solution for trapezoidal roofs
- + Height-adjustable rail support for flexible installation
- + Pre-assembled L bracket design for fast and efficient installation

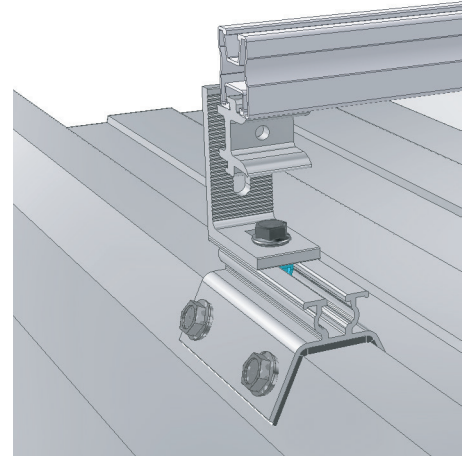

EFFICIENT DIRECT FASTENING FOR TRAPEZOIDAL ROOFS

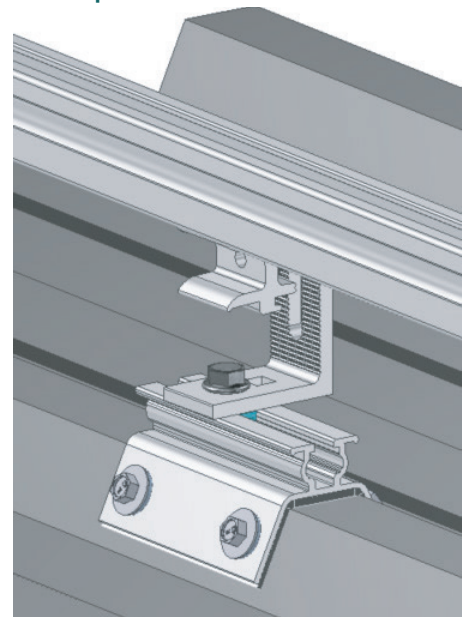

TrimFix EMU and KingFix EMU are cost-effective fastening solutions designed for self-supporting trapezoidal sheet metal roofs and sandwich panel applications.

Engineered for quick and efficient installation, the systems attach directly to the roof surface without the need for connection to the substructure, while still delivering excellent load-bearing performance and reliability. Compatible with Schletter's adjustable rail profiles, they allow for flexible rail height adjustment to suit a variety of installation requirements. Manufactured from high-quality aluminium and stainless steel components, the systems provide outstanding strength, durability, and long-term corrosion resistance.
