

RAPID CROSS CONNECTOR

- + Economically priced, quick and safe
- + Can be assembled from above
- + No additional tools required
- + 25-year Warranty

THE CONVENIENT WAY TO CONNECT OVERLAPPING RAILS

The Rapid cross connector can be fastened to any rail which has a Schletter-Klick channel M8. One central fastening point with a single bolt guarantees quick assembly. The distribution of forces is structurally optimized by the new hook-in and clamp technique, to ensure that profiles cannot be twisted due to unsymmetrical loads.

All benefits of the Rapid system can now also be leveraged by the cross rail system!

TECHNICAL DETAILS

Scope of application	For the acceptance of module support rails. Completely pre-assembled for ProLine channel
Material	Systems components: + Aluminium connector
