

# RAIL JOINER PROLINE

- + Tool-free self locking slide in connector
- + Internal connector with integrated position lock, eliminating the need for additional screws
- + Allows seamless connection of multiple rails to create a longer rail with no gaps

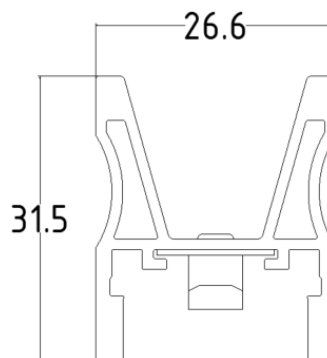

## EFFICIENT AND SECURE RAIL JOINING SOLUTION

The Schletter Proline Splice Joiner for Rail is a robust and efficient solution designed to connect module support rails seamlessly.

Crafted from high-quality aluminium (EN AW-6063 T6), this splice joiner features reduced material for improved stability and a well-optimised geometric design, ensuring durability and strength. It is compatible with Proline module-bearing

## DIMENSIONS

## TECHNICAL DETAILS

|                             |                                                                                                                                                                                                     |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Scope of application</b> | Used to connect two mounting rails together in a solar installation system                                                                                                                          |
| <b>Material</b>             | Aluminium                                                                                                                                                                                           |
| <b>Structural analysis</b>  | Structural analysis according to the current specific national standards (Australia AS/NZS 1170.2-2021). It also complies with DIN EN 1991-1 based on Eurocodes and general construction approvals. |
| <b>Warranty</b>             | 25 years according to warranty terms                                                                                                                                                                |
